

# Installation

## Préparation des paquets

On vérifie d'abord les mises à jour

```
apt update && apt upgrade
```

## Télécharger le paquet

On peut télécharger le paquet emby depuis le site web : <https://emby.media/linux-server.html>

```
wget https://github.com/MediaBrowser/Emby.Releases/releases/download/4.8.11.0/emby-server-deb_4.8.11.0_amd64.deb
```

## Installer le paquet

On peut maintenant installer le paquet tant voulu !

```
dpkg -i emby-server-deb_4.8.11.0_amd64.deb
```

## Terminer l'installation

On se retrouve sur le navigateur à l'adresse : `http://<IP>:8096`

On voit alors l'interface d'installation d'Emby :

## Welcome to Emby

[Quick Start Guide](#)

This wizard will help guide you through the setup process. To begin, please select your preferred language.

Preferred display language:

English (United States) ▼

La langue des métadonnées

## Configure Remote Access

Enable automatic port mapping

Attempt to automatically map the public port to the local port via UPnP. This may not work with some router models.

← Previous

Next →

On laisse le mapping des ports en automatique

## You're Done!

That's all we need for now. Emby has begun scanning your media library. Check out some of our apps, and then click **Finish** to view the **Server Dashboard**.
